and concession price for sons & high schoolers

Phil is a passionate man for human justice in developing countries like West Papua, as well as for a responsible care of Australia's natural forests and National Parks.

His training as an environmental scientist specialising in bushfire behaviour, has developed Australia's only peer-reviewed bushfire behaviour model designed for broad scale operational use.

Phil is keen to tell us about his drive and inspiration to address Australia's serious summer bushfire issues. As summer approaches, fire strategies need good outcomes!
